Login in system with your login and streaming key. Service admins may be created with any credentials.

Streaming key you can find on the settings page of liveedu.tv:

Use only a part after symbol "=" (on screenshot filled with black) as your streaming key.

After successful login you will see upload file widget. It supports chunked upload, pause and resume.

You can rename file before uploading. When ready press UPLOAD button.

You will see progress bar near each file and for overall process. Don't close the page until upload is finished.

After uploading you can manage your files. Press MANAGE button on top navbar.

Videoupload   Upload files   Manage uploads   shamanu4 ▼

Select files   Upload

| BigBuckBunny.mp4 | 158.0MB |
| SampleVideo_1280x720_5mb.mp4 | 5.3MB |

All files are uploaded. Now you can manage them on other page.

There you can check video in player, change project and delete.
If you have permissions, you also can change file owner and start transcoding.

BigBuckBunny.mp4	shamanu4	default	✏	▶	🗑	⚙	uploaded	0.00%
cryptoplugin-1.2.2-all.deb	shamanu4	default	✏	▶	🗑	⚙	uploaded	0.00%

check file in player

overall status and progress

you may change project and file owner if you have permission.

default project means current active user's project

After transcoding is started you can view its status and progress.

After successful transcoding files will be moved to storage server and registered in LiveEdu database.

If you see empty file list after transcoding - task is completed successfully.
Otherwise you will see
an error text in status.
